

# Disabling Pop-up Blockers In Internet Explorer

1. You have the ability to disable pop-up blockers in Internet Explorer in two different ways.

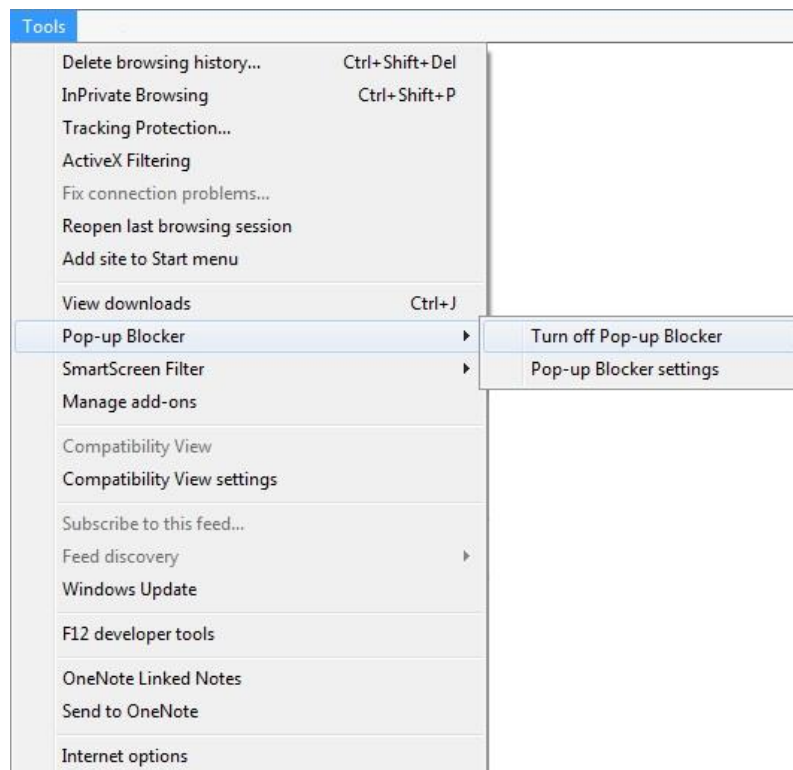

1.1. The first way requires Internet Explorer to be open and the **Menu Bar** to be active.

1.1.1. You can activate the menu bar by right-clicking the top of the window and selecting **Menu Bar**.

1.1.2. Select the **Tools** option and a list of options will display.

1.1.2.1. One of the options in the list is **Pop-up Blocker**.

1.1.2.1.1. If you expand the **Pop-up Blocker** option, it displays the option to turn on or off your **Pop-up Blocker**.

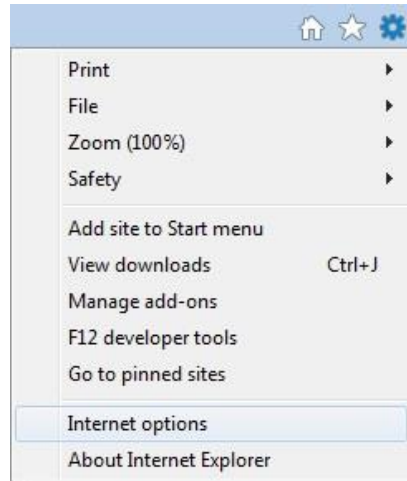

1.2. The second way does not require Internet Explorer to be open but it can be accessed through Internet Explorer.

1.2.1. This option to disable pop-ups can be found in **Internet Options**.

1.2.1.1. You can get to **Internet Options** two different ways.

1.2.1.1.1. You can click on the **Gear Icon** and select **Internet Options**.

1.2.1.1.2. You can go to the **Control Panel** and select **Internet Options**.

1.2.2. Once in **Internet Options**, you can go to the **Privacy** tab.

1.2.2.1. Within the **Privacy** tab you will see the **Pop-up Blocker** option.

1.2.2.1.1. Uncheck the **Turn On Pop-up Blocker** box to disable pop-up blockers.
